

Final Project Check-in Rubric

COCS 4550/5550

Intro to AI

Fall 2017

You're now halfway through your project time. How as progress been coming? Are you halfway done the work for you project? (because you should be!) If you haven't been making good progress, or the problem you took on is too difficult, this is a good time for a reality check, to narrow your problem down into something smaller and more manageable that you can finish in a couple weeks. Don't forget to budget time to actually make and edit your video too!

Your check-in should briefly and succinctly touch on the topics mentioned below, and be no more than one page in length (plus figures). Please email this as a pdf to me (ncheney@uwyo.edu) by 11:59pm on 11/17 with the subject line: "*yourFirstName_yourLastName_COCSyourClassNumber_ProjectCheckIn*"

Successes – What has been your biggest accomplishment towards your end goal so far? Do you have any initial results to share? (Plots and figures are welcome, if you have them).

Unexpected Challenges – What has been a stumbling block for you that has been much harder than you imagined? Has there been anything that you thought would be very difficult, but you ended up being able to breeze through?

Realistic Outlook – Do you think that what you have left is achievable in 2-3 weeks? Remember that finished videos are due on December 7th (regardless of when you present to the class)!

Adjustments – If you plan on making major changes to your project outline to make it achievable in the next couple of weeks, please briefly summarize them here.
